

USING LART SUPREME PRODUCTS

LART

you can become a master of manicure and create truly masterful nails in a few simple steps!

STEP 1:

Prepare the nail plate: disinfect your hands and the client's hands. Using a rosewood stick or a metal chisel push the cuticles aside. Do not use a cuticle softener! Gently smoothen the nail plate (you can use a buffing block, or a 240/240 file). Remove the cuticles with the cutter.

Apply a very thin layer of **LART SUPREME GEL** onto 1/3 of the nail and dip it in **LART SUPREME NATURAL POWDER**. Do this with several brush strokes, so that the layer is even and thin. Otherwise, after dipping in powder, the nail plate will become thick and bumpy. If there's too much powder left on the nail, remove it with a soft brush before applying another layer.

STEP 2:

Apply another thin layer of **LART GEL SUPREME** onto 3/4 of the nail and dip it in **LART SUPREME NATURAL POWDER**. Do this for all 10 nails. In case of long nails, repeat the action to build the nail structure accurately. Shape all nails using 100/180 file. Once you're done, smoothen all nails with the buffing block.

STEP 3:

Starting with the first nail, apply **LART GEL SUPREME** close to the cuticles, but without touching them. Slowly dip the nail in the color powder. Shake off any excess powder. Repeat for the remaining nails. After applying each layer of color, swipe the nails with a soft brush.

STEP 4:

Apply **LART GEL SUPREME** to the entire nail, then dip it in the color powder. Repeat for the remaining nails. Very carefully remove all excess powder from the nails and cuticles using a soft brush. Refine the nail - **LART SUPREME COLOR POWDER** has to be smooth-out very gently, especially near cuticles. The most safe way to smooth surface is to use buffer only, instead of file. **LART GEL SUPREME** will level out all irregularities so you do not have to worry that nails will be rough. If you are afraid that you may over buff color, apply extra layer of **LART GEL SUPREME** then start buffing. Extra layer of **LART GEL SUPREME** will protect color from wiping off.

STEP 5:

Apply **LART SUPREME SHINE FORMULA** onto the nails using a clean dust-free pad – wipe the entire nail with a moist pad. Apply a very thin layer of **LART GEL SUPREME** with quick brush strokes onto the five nails. Make sure to omit the cuticles and secure the free edge of the nail. Slowly and carefully apply a second layer. **AFTER EACH NAIL** wipe the **LART GEL SUPREME** brush with a dust-free pad. Repeat for the remaining hand. Wait 1 minute and apply cuticle oil onto the cuticles.
